

Oncology Imaging Systems Ltd April 2010

New customers in Belgium for Oncology Imaging Systems Ltd

The United Kingdom, the Republic of Ireland and now Belgium - this year Oncology Imaging Systems Ltd have successfully launched their range of Beekley skin markers into Europe.

New customers include the Clinique Saint Jean in Brussels, the Clinique Louis Caty, part of the Hospital Network for Social Medicine (Réseau Hospitalier de Médecine Sociale) in Hainaut as well as the Clinique Sainte Elizabeth in Namur.

Beekley provides the most comprehensive, technologically advanced and proven skin marking systems available. They offer a simple and effective way to identify specific points of reference on film, as well as protect temporary treatment marking for up to four weeks. Easy and quick to use, Beekley's systems streamline radiographic and treatment procedures, making the processes faster, more accurate and more cost effective.

The innovative task specific range of Beekley markers have proved extremely successful in Belgium with nothing else comparable on the market. "We're also looking at launching QFix over here" said Emma Methven, OIS representative in Brussels, "certainly the departments we've visited were very excited about the prospect of good quality competitive products, especially within thermoplastics."

Oncology Imaging Systems Ltd is the sole distributor of Beekley and WFR-QFix in the UK, the Republic of Ireland, Belgium, Luxembourg and Holland.
