

Oncology Imaging Systems moves to new offices

Due to continuing success and expansion, patient positioning and immobilisation specialist, Oncology Imaging Systems have relocated their offices to a new purpose-built development in East Hoathly, East Sussex.

Located close to their previous address in Uckfield, the new site offers better access with more storage and office space. Upscaling to this 1,227sq ft facility marks another milestone for OIS and is a great start to the company's 10th year of business.

Oncology Imaging Systems Ltd specialises in patient positioning and immobilisation devices for the medical industry, including Radiotherapy, CT, PET and MRI, Mammography and Diagnostic Radiology. OIS represents many major medical equipment manufacturers including Carestream (Kodak), LAP Laser GmbH, Beekley, Initia RT and WFR/QFix.

OIS supplies to every single Radiotherapy Centre in the UK and Ireland and has strategic commercial alliances with other leading clinical solutions providers including GE, Varian, Siemens, Philips, Elekta and Toshiba. Founded in 1999, OIS continues to provide the best products and the best customer service, putting you and your patients in the best position.
