For image registration

PinPoint for Image Registration is a breakthrough fiducial marker with a unique conical design to assist in accurate image registration under both CT and MRI. The conical design directs probes to a 1.27mm diameter center hole, a registration area 37% smaller than other commonly used fiducial markers.

PinPoint® for Image Registration

Order code: 128

Contents per box: 30

- conical design with a 1.27mm diameter center hole
- ideal for image registration performed under CT and MRI
