Beekley CT-SPOT® CT SIMULATION MARKERS

Achieve bright, artifact-free imaging with Beekley CT-SPOTS non-lead pellets, lines, and crosshairs for more accurate CT treatment planning calculations. Beekley CT-SPOT skin markers are ideal for marking a variety of specific points of reference and other areas of concern. These unique non-lead pellets, crosshairs and lines image brightly during simulation without streaking or artifact, and are guaranteed not to move or shift during positioning.
