

# Chabner XRT® Radiation Bra

**FITTING BRAS & LARGER SIZES NOW AVAILABLE!**

The Chabner XRT® Radiation Bra provides optimal breast support during simulation, planning and radiation treatment, including proton. The bra can also be used for breast support during other radiologic procedures such as CT, MRI and diagnostic X-rays.

Designed by Radiation Oncologist  
Dr. Elizabeth Chabner Thompson

Customizable for a wide variety of body types

Transparent material allows visibility essential  
for reproducing patient position

Washable, reusable fitting bras provide a  
unique solution to properly size the patient

visiφnrt | COMPATIBLE

MRSeries™

ProtonSeries™

- User-friendly for patient, therapist and physician
- Made of lightweight, advanced materials providing enhanced support ideal for positioning the breast and ensuring patient comfort without irritation or sensitization
- Strategically-placed thermoplastic polyurethane (TPU) windows allow visibility of skin and bony landmarks essential for repeatable patient position
- Tested at 6 MeV and 6 MV to demonstrate that the radiation beam can pass through treatment areas\* of the bra without attenuation
- Intended for use by a single patient throughout treatment, the garment is reimbursable by insurance: All points of Velcro® attachment are indexable so patient can be custom-fit at the time of simulation and throughout treatment
- Available in 13 sizes; back extender and shoulder strap extenders offered for additional fitting and sizing options

\*Velcro attachments, located outside of treatment area, resulted in slight attenuation at 6 MeV
